Opis produktu

Initially, qualitative research is a study of the individual case history (e.g., Robinson in psychoanalysis) or the life of a particular group (usually a social class) (qualitative sociological or anthropological research). However, in practice, what is meant is the study of the response of a particular group to a particular situation, such as the response of a particular group to a particular policy (e.g., Robinson and Wright 1990, 1992).
